

HYDROPONIC NFT CHANNELS WASHING MACHINE

High efficiency machine for inside and outside cleaning using high pressure water and disinfectants

ADDITIONAL INFORMATION

NFT channels can quickly become infected with pathogenic infections.

Cleaning the NFT's before or after each growing round can remove the pathogenies and cut the infection line.

Tecto's NFT channel machine cleans NFTs in two steps. In the first step, high pressured water is mixed with disinfectant, while in the second step, clean water is used to clean out any leftover disinfectant, soil, and plants. In other words, Tecto's NFT channel machine is like a car wash for NFTs.

UNIQUE ADVANTAGE

- Cleans the inside of the channel with unique high pressure nozzle and the outside using a fan nozzle.
- Easy to use and maintain
- Made of stainless steel.
- Cleans soil and plant leftovers

TECHNICAL DATA

- Cleans 60x70mm NFT channels (can be customized). Max. channel length can be customized.
- length of machins = 2 x (NFT length) + 1.2mtr
Power: 3x32A 400Vac
- capacity: 100-140/Hour
